

# Checkbox® 5

Version 5.0.0.72 Release Notes

---

The following issues are addressed by Checkbox version 5.0.0.72:

- Anonymous respondents unable to resume surveys using Cookies.
- Various style updates for more consistent cross-browser appearance.
- Invitation reminders not sent in some cases.
- Survey Administrator not able to edit responses.
- Score Message survey item not functional.
- Summary table only shows response counts and not aggregated data.
- Export results screen does not provide an option to download files uploaded by respondents using the Upload File survey item.
- Non-admin users with Survey Administrator role encounter errors in the survey manager.
- Built-in browser spell check function no longer blocked in item editors.
- All colors update in style editor preview when one color is changed.
- Survey style editor preview does not update background color.
- Invitation URL not processed correctly by survey page in some cases.
- Role and Application Setting caches now enabled by default.
- Performance improvements for listing folders and surveys.
- No way to choose min/max values for single line text items with date formats.
- Survey item editor closes open page when an item is deleted.
- Formatting issue causes column shift on View Responses page when response has no end date.
- Hyperlink/Redirect item does not always show link.
- Close window item is not functional.
- Logic error prevents updating profile properties for users.
- User name validation disallows email addresses.
- Question items can be moved to the completion page of surveys.
- Multi page reports missing option to switch pages.
- Response Id column on view responses page too narrow for 6 digit response ids.
- Item option editor does not work properly when options contain apostrophes.
- Style editor does not work when header or footer contain newline characters.
- Copied report items miss some configuration information of the original item.
- Invitation opt out link directs respondent to nonexistent page.
- Matrix item has some formatting issues.
- Hard to find links to click to edit matrix rows and columns.
- Unable to create conditions based on matrix children.
- Matrix sum total item cannot be configured to allow a sum of zero.
- Rendering issue causes search results dialog to show results off bottom of screen.
- Superfluous parentheses shown in View Response Details page.
- License issue that restricted number of Survey Administrators to one in cases where license should allow unlimited.
- Invitations not properly tracking “Responded” recipients.

- Rating scale numbers not centered under Checkboxes.
- Survey rendering needs improvement when question numbers or required field indicators are shown.
- Matrix options are not evenly spaced.
- Library editor view not updated when item is deleted.
- Survey preview fails in IE due to Javascript error.
- Matrix rows missing “Merge” option.
- Test Survey url does not include forceNew parameter.
- Error occurs when enabling “Other” option for radio buttons and Checkboxes.
- In Launch Survey Wizard, no way to select respondents when setting survey permission to Access List.
- View All Survey Invitations screen does not include a link to create a new invitation.
- Default value for “Columns” causes radio buttons and checkboxes to repeat vertically even when appearance changed to horizontal.
